

PUSH-TO-TALK (PTT) BRIDGES THE GAP BETWEEN LMR AND BROADBAND.

Do You Have The Expertise To Ensure Peak Performance?

Are access and talkgroup management time-consuming?

Provisioning can be a manual and lengthy process without the right tools and resources

Are you using disparate management tools?

80%
of government IT leaders
had at least one critical network outage
in the last three months

2016 Center for Digital Government Study

Can you keep up with ongoing software needs?

Regular management of software needs is integral to performance

EASILY ADD NEW USERS

Use our user-friendly online portal to enter provisioning requests. Once approved, **new users are typically added within 48 hours.**

MINIMIZE DOWNTIME

Rely on us to proactively **monitor and resolve all PTT application and system issues.**

BENEFIT FROM ENHANCED CAPABILITIES

Pre-tested and certified WAVE 5000 software updates are applied regularly to ensure your users have access to the **latest features and capabilities.**

WAVE AS A SERVICE

MAXIMIZE PERFORMANCE AND REDUCE RISK

PREDICTABLE OPEX COST STRUCTURE

With a WAVE as a service (WAVEaaS) subscription, you gain all of the benefits of PTT without the upkeep or resources required to support your own application. Forgo upfront capital and ongoing expenses for hardware, software and maintenance. You will have the flexibility to scale, deploy and support your organization's PTT needs efficiently and effectively as they evolve, with access to the latest security updates, software releases and capabilities through a predictable OPEX IT cost structure.
